

Cromwell class have been working really hard on their sketching skills this term. We have been sketching amphibians and fish linking to our topic on animal classification. We have now moved onto sketching a scenery to look at foreground, middle ground and background in art. The children are becoming a lot more confident on creating a 3-dimensional image with their shading.

We have also been busy gardening and looking after our outdoor space. We are growing strawberries, lettuces, colourful chard and a range of flowers!

On Friday, the children used recycled materials to create some 3D fish. They all persevered and were able to cut out all the pieces they needed for their fish. They then took on the challenge of using a hot glue gun for the first time (with adult supervision of course!). The children were brilliant and we can't wait to display these unique creations.

To augment our topic on animal classification, we welcomed a special visitor who introduced us to some fantastic reptiles, insects and mammals. The children asked some fantastic questions and were so eager to learn about the habitats and life cycles of all the different animals.

We then began looking closely at insects, where the children went on a minibeast hunt. We even got to explore the pond!
