Wildlife Watch

Packham Class

28 February - March 7th, 2022

Packham class set the camera up in their garden located at the front of the school. In just one week they saw 7 different species of animals. There were birds; a pair of blackbirds, a lot of pigeon shots, and a cheeky robin. There was a fox and a black and white cat spotted at night, whilst a squirrel was caught during the day. There was one group of animals seen both in the morning and at night and that was a family of deer. There was one adult male, one female, and one deer that looked very young.

Adult and young deer
