

Nelson Academy's

# Wildlife Watch

Year 3

April 2022

Year 3 set the camera up in wild area over-looking over the pond. Most of the pictures captured were of a pair of ducks. There was a male and female duck and they made a nest and started laying eggs.

Unfortunately, something ate their eggs, and the two ducks have left. We are going to build a duck nesting box for next year and hopefully more ducks will arrive and find the pond a good place to raise some ducklings.

The pictures also showed us that lots of birds come to the pond. The picture below shows three little birds singing melodies pure and true (or maybe they are just getting a drink or having a bath).
