

Plastic Bottle Top Collection

Bring in your clean caps, bottle tops, and lids.

We are going to glue them together to create a piece of art for a national competition. If we win, we will be able to win new equipment for our playground. There will be boxes by the entry doors. We need as many as we can by the 17th of May.

Bottle Brick Creation

We are challenging every child to bring in one bottle brick. These are made by taking an individual single use drink bottle and stuffing it with non-recyclable plastics such as sweet wrappers or the plastic used in fresh veg packs. As long as it is clean- stuff it into a bottle. Use a long handle spoon to really jam it in- so it is solid.

These bricks will go towards making some raised beds as well as keeping a lot of plastic out of the landfill. We will be showing how to make a bottle on dojo.

ECO-CHALLENGES

Summer Term Part 1

Battery Collection

We have registered to take part in a national battery recycling campaign. We're asking children to bring in dead batteries- so we can send them off to be recycled. The class that brings in the most batteries- will win a special treat.

Stick Person Challenge

Can you create a stick character, who can become our official Eco-club mascot? Remember to only use recycled or natural materials. Give your character a name and tell us about their creation; such as "Where did you get the stick from?". Bring in your figure on May 20th, and make sure you have your name and class attached.

How about a drink?

The weather has been rather dry, and our wild friends would appreciate a drink. A shallow dish, plant saucer, or even an old roasting tray can be made into a welcome source of water for wildlife. Pop a couple of rocks into larger containers for birds to perch on. Dishes with shorter sides can be readily accessed by hedgehogs. Take a picture of your drinking station and send it in.
