

Geography – Spatial Sense/Local Area Study (2)

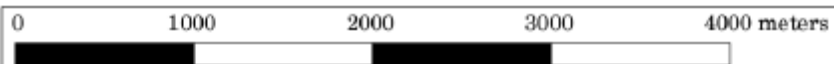

Year 4

Vocabulary	Definition
scale	Map scale refers to the relationship (or ratio) between distance on a map and distance on the ground. For example, on a 1cm:1km scale map, 1cm on the map equals 1km on the ground.
symbol	Cartographers (people who draw maps) use different symbols on maps to represent real features from the world. A symbol is a simple and quick to draw picture.
key	A key explains what colours and symbols mean.
population	The number of people living somewhere.
Land use	What the land is used for – housing, farming etc...
Aerial (view/photo)	Pictures/photos of the earth, taken from above.

Map Scale

a) (1 centimeter represents 250 meters)

b) **1: 25 000**

c) 

Compass Points
