

## Year 1 Knowledge Organiser- Geography - Spatial Sense

Direction.

Forwards, backwards, left and right.

Next to.

Far from.

Behind.

Key.

North, East, South and West.

**Aerial Perspective-** When you look at something from above this gives you the aerial perspective. The vision as if you were flying above the area.

**Key -** A key gives you information needed for the map to make sense. Maps often use symbols or colours to represent things, and the map key explains what these things mean.

This term we will be exploring spatial sense. Learning how to read a map and follow simple directional instructions is an excellent skill to have. We will be exploring the school using a compass and drawing our own maps.
