### LINE

- Recognise lines as horizontal, vertical, or diagonal.

### B. FORM

- Explain that form, in the discussion of art, is a term useful for describing complex shapes, often organic rather than geometric, as well as three-dimensional as opposed to flat shapes: the 'form' of a human figure, for example, or the form of a tree.

### C. SYMMETRY

- Recognise common objects and shapes (squares, faces, trees) as symmetrical (where a part of an image or object is reflected or balanced in another side), or not symmetrical.
